

Abstract:

Campus Recruitment System is a job portal that allow more companies to recruit UTAR students as internship trainee or as full-time workers after the students graduate. The system will help to reduce the issues of students unable to get placement after completing their study

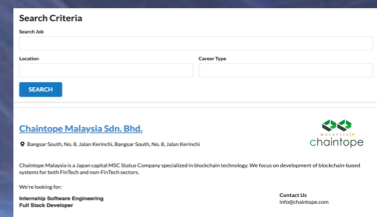

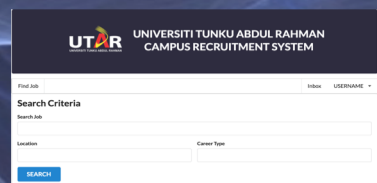

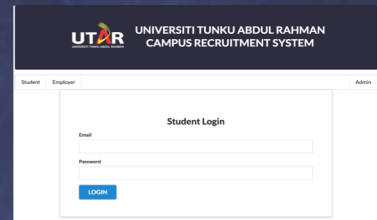

Objectives:

1. To conduct a survey by using questionnaires to gather information
2. To conduct literature reviews on similar system
3. To develop a web-based application system for the campus recruitment

Methodology:

Result:

Future Work:

- To open up the platform for all students in UTAR
- To allow students and employer to perform registration
